# Loudspeakers-Switchbox AT1643

## **AURITEC help you to make a pediatric audiometer out of your PC audiometer!**

- › With our switch box, including amplifier and the console you can control up to 8 loudspeakers with or without masking.

AURITEC is the market leader with children audiometry in Germany. Our systems have been being used in schools, by pedaudiologists, pedacousticians or clinicians for 20 years.

- › Noticing that the users are demanding professional solutions on the basis of their current installations, we decided to develop a complete new switch box fitting with every kind of PC audiometer.
- › Additional to our pediatric expertise you can use our service and experience in insalling system in any kind of room, depending from the place you can take into account.

We work together with architects and room planers an are able to give you an estimation on the convenient place of the loudspeakers.

- › We also can provide you with any kind of VRA systems, from a dancing bear to the electric train for better conditioning of your young patients, depending on their age.

Above all, our systems are all compatible with the modern and classic speech tests, now available in different languages.

Please let's also talk about the combination of our audiometers with hearing aid fitting systems, about new headphones, NOAH and much more!
